

Up a Creek:

Resilience, Rafts, & Revenge

Don't

Pick

Me!

Design Challenge:

Create a buoyant watercraft out of crude materials that can (and will) send one of these “mystery” teachers down Coahuilla Creek.

Design Brief:

In our last design challenge of the year, it is time to send your teachers out to sea, so to speak. They will be at your mercy, so obviously your team will want to design the most buoyant watercraft you can. Seriously, or else they will sink to the bottom of Coahuilla Creek and sleep with the fishes. You wouldn't want that to happen to them, now would you?

All kidding aside, this is a competition, so it's sink or swim for all of you. Does that float your boat?
